

RSM Distribution Product Catalog

RSM Distribution was established as a home based "Cottage Industry" in December 1989 in order to provide a source for those hard to find control line products that were disappearing quickly from the local hobby shop shelves. The initial emphasis in the early years was on items such as line clips, fuel tanks, control line engines, flying lines and similar hardware.

By 1992 it became apparent that quality control line kits were simply unavailable. Most manufacturers were eliminating the C/L kits, concentrating on one or two simple profiles or a selection of 1/2A basic starter kits and the balance of their production going to R/C kits. A control line flyer who wished to build anything other than a Ringmaster, Shoestring or one of the few kits produced by SIG was forced to obtain a set of plans and scratch build. For this reason RSM Distribution decided to get involved in kit design and manufacturing. This decision required that the company cease being a home-based "Cottage Industry" and concentrate full time on control line supply. An industrial unit was rented and the company moved from the owner's garage to a warehouse/manufacturing location.

The popularity of the VSC showed that many control line flyers enjoyed the Old Time and Classic designs, which many of us grew up with. It was decided that RSM's primary concentration would be in this class of kits using only "contest" weight balsa. In this way the company could provide kits that were lightweight and capable of contest level performance.

In 2001 we invested in a laser cutter. Although the machine was very expensive it offered extreme accuracy and the ability to make very intricate cut patterns. The result was to allow RSM to produce the finest control line kit in the marketplace. We started with the Warburton Tony and Tucker Special in 1992 and as of July 2013 we produce over 55 kits. We plan to continue to add more kits each year.

Control line kit production automatically lead the company into producing its own line of high quality control hardware such as wire flap & elevator horns, wing tip weight boxes, flap/elevator "Lucky Boxes", adjustable lead out guides, carbon fiber bellcranks, stainless steel control lines, line wrapping kits, eyelets and sleeves. RSM Distribution has responded to the increased popularity of electric power by providing electric flight components as well as complete Sport Level and Competition Level electric power systems.

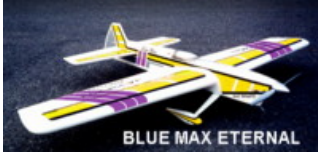

Our company policy is to continually seek out new products that can be used by the control line flyer, stock those products or have them manufactured if they are not available and continue to add new control line kits. RSM Distribution promises that it will always deliver products ordered as quickly as possible.

We promise that if a product is not available at the time you order it we will tell you that it is out of stock and also that we will tell you when we expect to receive new stock. We will never cash your check or charge your credit card until the product is actually shipped. In addition to these promises RSM Distribution guarantees if you are not completely satisfied with any product you purchase we will either replace the product or refund your money in full. This is the way we have done business in the past and it is the only way we will ever do business in the future.

TERCEL

RSM Part Number: TERCEL

TERCEL designed by Keith Trostle. This precision aerobatic model won 1/2A at the US National twice (two different pilots) so it is highly competitive. Due to changes in model engines over the years Col. Trostle asked that it be upsized to take advantage of the more powerful .061 glow engines. For those who wish the Tercel can be built for electric power use. Wing Span 36.6", Area 246 sq. in. Length 23.5", Nose Moment 5.7", Tail Moment 9.3".

The Tercel kit comes with laser cut parts using contest grade balsa and birch plywood and a custom hardware package. For those who dislike the 1980'a "Genises" look there are two different canopies and two different vertical fins so you can change the look of the model.

Arming Switch "No Spark"

RSM Part Number: ARMSW

This pre-assembled battery arming safety and convenience switch is perfect for electric powered airplanes using medium to large size high-power battery packs. By AMA rules an Arming Switch must be installed in any full body stunt ship. This arming switch eliminates the need to unplug the battery to turn your vehicle off, instead you can just pull the connector key. The pre-installed Deans Ultra connectors allow it to be easily installed between your battery pack and your ESC (electronic speed control) with no soldering required. The push button is held down for 2 seconds to send a small current to the ESC to warm up the capacitors. This stops the dangerous and annoying spark when you plug in the battery. Comes with everything you need to easily install it in the model.

\$13.99

Battery Checker

RSM Part Number: BATTCHECK

A clever device that can show you the condition of your battery packs. It can be used with the most common battery types used for modeling, namely:

- *Lilon (Lithium Ion)
- *LiPo (Lithium Polymer)
- *LiFe (Lithium Ferrite)
- *NiCd (Nickel Cadmium)
- *NiMH (Nickel Metal Hydrate)

For Lithium based types (LiPo, Lilon, and LiFe), it will work with pack sizes of 2S to 7S and for NiCd and NiMH packs it supports 4 to 7 cells.

There is no battery inside the Controller; it is powered from the battery pack you connect for testing.

When you connect a pack to either of the two connectors (only one at a time) the Controller will display the total voltage and an estimate in percentage and bar graph showing how full the pack is.

NEW VERSION - Now includes automatic balancing function for LiPo and LiFe packs.

The RSM CAPACITY CONTROLLER is a quick, convenient, easy-to-use device. It shows at a glance the remaining capacity in your battery pack, cell balance, and other information you need to get the best performance and reliability from your batteries, and avoid costly mistakes. Great for checking packs before use and after charges or before storing. Shows at a glance the remaining capacity in your battery pack, cell balance, and other information you need to get the best performance and reliability from your batteries Works with most battery types on the market.

\$17.99

Charger Balance Board XH

RSM Part Number: AdaptorXH

Balance Board for Charger. Connect JST/XH style battery balance plug (the most common balance plug found on Lipo Batteries) to Charger for safe charging

\$9.99

ZTW - ESC LED Program Card

RSM Part Number: ZTWLED

ESC LED Program Card for ZTW ESC. Although our ESC's are fully programmed for C/L flight when we ship them you may wish to change the settings. This LED programming card works with all of the Mantis models of ZTW Speed Controllers that we carry. It provides a quick easy way to set all of the speed controller programming options at the same time.

Brand: ZTW
 Item: Mantis ESC LED Programming Card
 Size: 70.0mm x 45.0mm x 13.0mm (LxWxH)
 Weight: 23.0g
 Usage: For ZTW Mantis ESC

Using Tips:

- ZTW LED Program card with LED display is easy to use and convenient to carry.
- All of the programmable functions are shown on the program card.
- Turn on the ESC.
- Remove the signal wire and plug it into the top-socket on the program card, wait for 2 seconds until the LED is on.
- If ESC is not connected with the batteries, the program card should be connected with other power supply, the range of power supply is from 5.0V to 6.3V.

KR Gov-Standard Horizontal ver 2

RSM Part Number: KR Gov-H

KR Governor ver.2, with Horizontal Pins & On/Off Slide Switch. Unlike other timers the KR Governor is a Flight Manager since it controls RPM, Flight Time and Start delay. Comes with a built-in slow start to save wear and tear on motor bearings. Instant stop in event of prop jam protects your system from burn out. It also increases the RPM when you go into a maneuver then drops it back to the take off setting when the maneuver is finished.

The KR Governor Flight Manager allows use of lower priced ESC to reduce cost yet it gives flight performance similar to high priced tuned pipe system.

Most customers use this configuration for built-up fuselages. Picture shows Governor only. NOTE: the KR Governor comes complete with a slide switch.

\$51.99

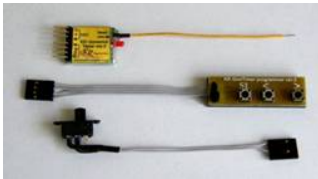

**KR Governor, Switch, Retracts & Programmer Package**

RSM Part Number: KRPKGR

KR Governor Ver.2 with Retracts, Switch & Program Stick. The KR Governor is really a Flight Manager since it controls RPM, Start Delay, Flight time & features increased RPM when you enter any maneuver (similar to how a tuned pipe glow system works). The Governor has the capability to operate retractable gear

The KR Governor Flight Manager comes with a soft start included plus it shuts down the entire electrical system in the event of a prop strike. It allows you to use an inexpensive ESC so it provide superior performance when compared to any other timer combined with less cost overall. Complete package saves you \$10.00 over purchasing each unit separately.

\$73.97

**KR Governor, Switch & Programmer Package**

RSM Part Number: KRPKG

KR Governor Ver.2 With Switch & Program Stick. The KR Governor is really a Flight Manager since it controls RPM, Start Delay, Flight time & features increased RPM when you enter any maneuver (similar to how a tuned pipe glow system works)

The KR Governor Flight Manager comes with a soft start included plus it shuts down the entire electrical system in the event of a prop strike. It allows you to use an inexpensive ESC so it provide superior performance when compared to any other timer combined with less cost overall. Complete package saves you \$10.00 over purchasing each unit separately.

\$63.97

**KR Program Stick ver 1**

RSM Part Number: KRPROG

KR Governor Programmer Unit. For use with the KR Governor ver.1 or ver.1.2. Set Flight Time, RPM, Start Delay Time plus Power Increase during Maneuvers. Simple to use at the flying field.

\$15.00

**KR Program Stick ver.2**

RSM Part Number: KRPROG2

KR Governor Program Stick ver.2. Sets Flight Time, RPM, Start Delay and Power Increase in seconds. For use with the KR Governor ver.2. Complete with easy to read instruction manual. Simple to use at home or at the flying field. Manage your flight settings without the need for a computer. Simple push button operation.

Laser Cut 3/16" Elevator Horns

RSM Part Number: RHORN

Laser Cut 3/16" Elevator Horns

\$0.99

RSM 1/8" Elevator Horn

RSM Part Number: HF18-2

RSM 1/8" Elevator Horn. 1/8" music wire with welded steel horn. Steel horn has slot for infinite adjustment. Simply insert the 4-40 heavy duty ball link and position for preferred throw rate.

\$7.49

RSM 1/8" Flap Horn

RSM Part Number: HF18-3

RSM 1/8" Flap Horn. 1/8" music wire with welded Steel Upright. The holes in the steel upright are angled properly to provide top level precision aerobatic performance. Non-bushed holes are perfect for 4-40 heavy duty ball links

\$7.49

Building Supplies * Pushrods

BALL LINK HD

RSM Part Number: BALLINKHD

DuBro Heavy Duty 4-40 Ball Link with swivel and socket head bolt. 2 links per package. Designed to thread onto the new right hand and left hand threaded RSM Push Rod Ends

\$8.99

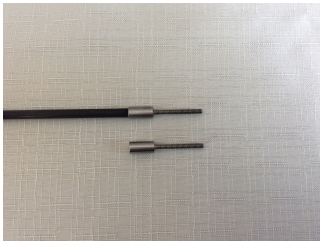

Carbon Fiber Tube

RSM Part Number: CFTUBE

Carbon Fiber Tube 5.0 mm OD X 3.0 mm ID X 1 M. Pultruded carbon fiber hollow tube. Priced at only \$0.16 per inch they are perfect for Push Rods. Match them up with RSM's exclusive Rod Caps (left and right hand threaded 4-40 ends) and Ball Links and you have a fully adjustable rush rod.

\$5.99

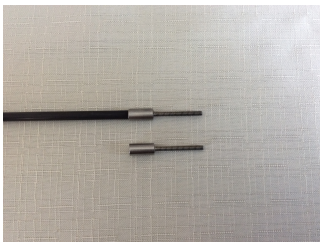

PUSH ROD END RH

RSM Part Number: PRENDRH

Push Rod Ends with 4-40 right hand threads. Insert Carbon Fiber 5 mm tube and fix with JB Weld. No need to wrap with Kevlar Thread to keep rod from splitting. Put a Ball Link on the threaded portion and the Push Rod is ready to use.

When used with the Push Rod End with left hand threads your new Push Rod can be shortened or lengthened by turning the rod clockwise or counter clockwise.

\$5.99

PUSHROD END LH

RSM Part Number: PREND LH

Push Rod Ends with 4-40 left hand threads. Insert Carbon Fiber 5 mm tube and fix with JB Weld. No need to wrap with Kevlar Thread to keep rod from splitting. Put a Ball Link on the threaded portion and the Push Rod is ready to use.

When used with the Push Rod End with right hand threads your new Push Rod can be shortened or lengthened by turning the rod clockwise or counter clockwise.

\$5.99

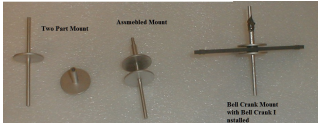

PUSHROD SYSTEM

RSM Part Number: PRSYS

Push Rod System that is infinitely adjustable. Just turn the carbon fiber rod left or right to increase or decrease push rod length. System includes RSM 4" Carbon Fiber Bell Crank, Lead out wires, 5 mm Carbon Fiber push rod tube, Right hand and left hand threaded push rod ends with Ball Links and 1/8 Flap and Elevator Horns. State distance from bell crank to flap horn and from flap horn to elevator horn when ordering.

\$64.95

Building Supplies * Bellcranks and Hinges

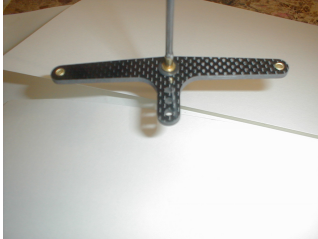

Bell Crank Mount

RSM Part Number: BCMNT

Bell Crank Mount. Machined mount for a suspended Bell Crank. Large plates keep to bell crank in the proper position yet allows it to rotate smoothly with no binding. Top parts slides onto the shaft for quick, easy installation. Hold in place with a bit of JB Weld. Strong and light weight

\$5.99

Bellcrank, 4" Carbon Fiber, Suspended

RSM Part Number: HF1003

Bellcrank, 4" Carbon Fiber. CNC machined from 1/8" thick commercial carbon fiber so it has no voids. Strong yet lightweight. Holes for lead out wires are brass bushed to eliminate wire cut through. Central bushing is made from low friction material for silky smooth operation.

\$19.99

Bellcrank, Nylon 3"

RSM Part Number: HF1001

Bellcrank, Nylon 3". Lead out wires have a tendency to "saw" through nylon. For this reason we press brass bushings into the bell crank to provide a wear surface. This virtually eliminates wear and tear on the holes where the lead out wires are attached to the bell crank.

\$2.99

Nylon Pinned Hinges

RSM Part Number: Klett

Nylon Pinned Hinges - 10 pack (Klett Style) 20 mm X 30 mm (3/4" X 1-1/4")

\$4.99

RSM Part Number: MADRIB

"Madman" Rib Set Laser Cut

\$29.99

WING JIG

WING JIG by RSM Distribution. Every wing jig regardless of it's price is designed to keep the leading and trailing edge parallel and straight. The RSM Rod Jig does exactly that at a very attractive low price. Unlike other wing jigs this one allows you to build the entire wing (except the wing tips) including installing the weight box, bell crank and lead out wires on the jig before needing to remove it from the rods. This keeps everything properly aligned during the building process. Comes complete with 6 jig uprights, 4 carbon fiber rods and jig extensions for longer ribs.

\$39.99

Building Supplies * Additional Laser Cut Rib Sets

UPDATE: DUE TO INCREASES IN MATERIAL COSTS. All RIB SETS will have a 50% surcharge added to their listed price. We are currently working on updating our website to reflect this change in the actual listed pricings.

Engines * Engine Accessories

"Back Plate Gasket" for OS 35S

RSM Part Number: BPOSS

Laser Cut gasket for OS 35S back plate

\$1.99

Pressure Tap

RSM Part Number: DuBro Pressu

Pressure Fitting for Muffler

\$1.99

Engine Accessories * FOX Parts

"Back plate Gasket" for Fox .35

RSM Part Number: FX35BP

Laser Cut Gasket for Fox .35 Stuffer Back Plate.

\$1.99

Engine Accessories * Tongue Mufflers

Pressure Tap

RSM Part Number: DuBro Pressu

Pressure Fitting for Muffler

\$1.99

Tongue Muffler for Brodak 25 & 40

RSM Part Number: TMUFB

Tongue Muffler for Brodak 25 & 40 complete with needed 3 mm mounting bolts

\$21.99

Tongue Muffler for OS 35S, K&B 40 & OS 25 FP

RSM Part Number: TMUFOS35S

Tongue Muffler for OS 35S, K&B 40, OS 25 FP & LA .25. Comes complete with 4-40 mounting bolts

\$21.95

Tongue Muffler for OS35-46

RSM Part Number: TMUF

Tongue Muffler for OS .35-40 & 46. Also fits OS LA 35-40 & 46 plus Double Star 40 Classic. Can be adjusted to fit Fox .35 Weight 2/10 ounce

\$19.95

Tongue Muffler for Super Tigre 46-51&60

RSM Part Number: TMUFST

Tongue Muffler for Super Tigre 46-51&60 Also fits Stalker .76

\$21.95

Engine Accessories * Needle Valves

ST 46 Assembly (fits OS40FP)

RSM Part Number: STNVA46

ST 46 Assembly (fits OS40FP). The spray bar fits the ST .46 engine and is medium length. Use in medium sized engine such as the LA.46, or OS .40 FP. NOTE: Spacers not included.

\$15.99

ST 51 Assembly (fits Fox 35)

RSM Part Number: STNVA

ST 51 Assembly (fits Fox 35). Spray bar fits ST .51 engines and is the shortest spray bar available. Use in smaller crank cases such as the Fox .35. NOTE: Spacers not included.

\$10.99

ST 60 Assembly

RSM Part Number: STNVA60

ST 60 Assembly. The spray bar fits the ST .60 engine and is the longest. Use on larger engines with wide crank cases. NOTE: Spacers not included.

\$17.99

ST Replacement Needle

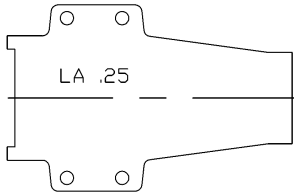

RSM Part Number: STNV

Replacement Needle for all Super Tigre Spray Bars. This needle is 2-1/8 " long so it fits properly through normal fuselages. NOTE: Photo for reference only. This item is just the needle.

\$3.99

Engine Accessories * Mounting Pads and Templates

RSM Engine Mounting Tool for Fox .35

RSM Part Number: FOXMNT

Laser Cut Mounting Tool for Fox .35 Engine

\$2.99

RSM Engine Mounting Tool for LA25

RSM Part Number: LA25MNT

Laser cut Mounting Template for LA25 engine

\$2.99

RSM Engine Mounting Tool for OS 35-40 FP & LA 35-40 & 46

RSM Part Number: OSMNT

Laser Cut plywood Mounting Tool for Os 35-40 FP & 35-40 & 46 LA engines

\$2.99

RSM Engine Mounting Tool for ST 40 & 46

RSM Part Number: ST46MNT

Laser Cut plywood Mounting Tool for ST 40 & 46 engines

\$2.99

RSM Engine Mounting Tool for ST 60

RSM Part Number: ST60MNT

Laser Cut Mounting Tool for ST 60 Engine

"Back Plate Bolts" for LA .25

RSM Part Number: LA25SH

Replacement Socket Head Bolts for LA .25 Back Plate

\$2.99

"Back Plate Bolts" for LA .46

RSM Part Number: LA46SH

Replacement Socket Head Bolts for LA .46 Back Plate

\$2.99

"Back Plate Gasket Kit" for LA .25

RSM Part Number: LA25BPGK

Back Plate Gasket Kit for LA .25 Engine. Laser Cut Gasket with four 2.6mm X 8mm socket head bolts.

\$5.75

"Back Plate Gasket Kit" for LA .46

RSM Part Number: LA46BPGK

Back Plate Gasket Kit for OS LA .46. Laser Cut Gasket with four 3mm X 8mm Socket Head Bolts.

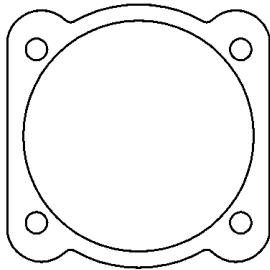

\$3.95

"Back plate Gasket" for Fox .35

RSM Part Number: FX35BP

Laser Cut Gasket for Fox .35 Stuffer Back Plate.

\$1.99

"Back Plate Gasket" for LA .25

RSM Part Number: LAS25BP

Laser Cut Gasket for LA .25 Back Plate

\$1.99

"Back Plate Gasket" for LA .46

RSM Part Number: LA46BP

Laser Cut Gasket for LA .46 Back Plate

\$1.99

"Back Plate Gasket" for ST .46

RSM Part Number: ST46G

Laser Cut Back Plate Gasket for Super Tigre .46

\$1.99

"Back Plate Gasket" for ST .60

RSM Part Number: ST60BK

Laser Cut Back Plate Gasket for Super Tigre V .60

\$1.99

"Gasket Kit" for Fox .35

RSM Part Number: FX35SG

Laser Cut Back Plate Gasket, Head Gasket plus socket head screws for back plate and head Set for Fox .35

\$5.75

"Gasket Kit" for FP40

RSM Part Number: FP40GK

Laser Cut Head and Back Plate Gasket for OS FP 35-40 engine. Complete with M3 x M12 socket head bolts for cylinder head and M3 x M8 socket head bolts for Back Plate

\$7.99

"Gasket Kit" for LA.46

RSM Part Number: LA46GK

Gasket kit consists of laser cut head & back plate gaskets, M3 x M8 Socket Head Bolts for the back plate and M3 x M12 socket head bolts for the cylinder head.

\$6.99

"Gasket Kit" for ST 46

RSM Part Number: ST46GK

Laser Cut Back Plate & Head Gasket Set for Super Tigre 46

\$3.99

"Gasket Kit" for ST 60

RSM Part Number: ST60GK

Laser Cut Back Plate and Head Gasket Set for ST 60 Engine

\$3.99

"Head Bolts" for Fox .35

RSM Part Number: FX35SH

Socket Head Bolts for Fox .35 Head

\$2.99

"Head Gasket" for Fox 35

RSM Part Number: FX35HG

Head Gasket for Fox .35 Glow engine. Laser Cut from high heat resistant gasket material. Can be torqued down to achieve desired head clearance. Full Head covered with holes for head bolts to pass through provides complete sealing.

\$1.99

"Head Gasket" for OS40

RSM Part Number: HGOS40

Head Gasket for OS35 - 40 FP/LA Glow Engine. Laser Cut from high heat resistant gasket material. Can be torqued down to achieve desired head clearance.

\$1.99

"Head Gasket" for ST 46

RSM Part Number: HGST46

Head Gasket for SUPER TIGRE .46 Glow Engine. Laser Cut from high heat resistant gasket material. Can be torqued down to achieve desired head clearance.

\$2.25

"Head Gasket" for ST 60

RSM Part Number: HGST60

Head Gasket for Super Tigre .60 Glow Engine. Laser Cut from high heat resistant gasket material. Can be torqued down to achieve desired head clearance.

\$2.25

Socket Head Bolt Set for Fox .35

RSM Part Number: FX35SH

Socket Head Bolt Set for Fox .35

Engines * Carbon Fibre Spinners

Light Weight Carbon Fibre Spinners

Carbon Fiber Spinner 2-1/4"

RSM Part Number: CF2125

Carbon Fiber Spinner 2-1/4" (58mm). Our Carbon Fiber Spinners are precision made in CNC metal molds and cured under pressure for lightweight strength and finish. The propeller blade cut-outs are pre-made for popular sizes, and are easy to open up if needed. The precision backplate is made from woven carbon fiber and lightened for strength and reduction in weight. The spinner cone and back plate weighs just 20 grams.

Tanks * Fuel Tank Accessories

If you have an application that requires a special tank, please contact our office at (951) 678-1406 to discuss your needs.

Profile Uni-Flow Tank Mount

RSM Part Number: PTMNT

Profile Uniflow Tank Mount with Hardware. Just attach the fuel tank to the mounting plate using RTY silicone. The notches in the ends of the tank mount allow you to adjust the tank height on a profile fuselage simply by releasing the bolt, sliding the mount up or down. Simply tighten the bolts and your tank is at the perfect height to draw fuel properly.

WING JIG

WING JIG by RSM Distribution. Every wing jig regardless of it's price is designed to keep the leading and trailing edge parallel and straight. The RSM Rod Jig does exactly that at a very attractive low price. Unlike other wing jigs this one allows you to build the entire wing (except the wing tips) including installing the weight box, bell crank and lead out wires on the jig before needing to remove it from the rods. This keeps everything properly aligned during the building process. Comes complete with 6 jig uprights, 4 carbon fiber rods and jig extensions for longer ribs.
